

# aicosoft - Artificial intelligence computer software for Medicine

For our team in Munich, we are looking to recruit a Physics / Computer scientist or Biotechnologist as

## Senior Software Developer (f/m) - AI/Medicine

### Your responsibilities:

- Design and set-up of a new machine-learning driven AI medicine platform
- Be part of a small, dedicated and newly formed multi-national team
- Have direct responsibility for implementation of respective development projects
- Design and development of micro services and REST-based APIs shaping our platform architecture
- Implement with fast and agile dev processes from specification to deployment
- Cooperate and interact directly with product management and the leadership team

### Your qualifications:

- Degree in computer science or related studies
- Professional experience as a Java developer
- Proven knowledge in the deployment of machine learning technologies (TensorFlow, Apache Spark, Python, Google Cloud Platform ML) and development of respective software systems with Java 8 or Python
- Knowledge of state-of-the-art microservice architectures
- Design / Integration of webservice interfaces
- Very good understanding of persistence in (No-) SQL based database systems
- Experience with build processes with Jenkins, GIT and Jira as well as virtualization and containers
- Unix skills, knowledge to deal with live systems
- Preferably proven knowledge of core banking and/or payment solutions
- Very good knowledge of written and spoken English
- Enthusiasm for excellence and a strong "hands-on" attitude

We offer you a challenging and varied opportunity with an innovative and dynamic company. With much passion and sense of responsibility, we work together on the medical revolution.

Design your future with us – become part of the aicosoft *people*!
